

Supplier Quality Engineer - Syracuse NY

We are in the process of identifying a key team member for our Central NY client. Key skill set attributes the successful candidate should have are: BS in Mechanical Engineering or Material Science with a strong background in machining and metallurgy, supplier certification and validation protocols, audit and corrective action, strong external and internal customer contact experience, ISO9000 and AS9100. A major plus is ASQ certification as CQE, CRE, or CQM or working towards it. Position is with a world class organization that values team member contribution and synergies. For immediate review and confidential consideration please email your resume to: chaset@barrowssearch.com
